Contents

Research Papers

Flow modelling in a dual porosity domain with automatic mesh generation and parameter calibration: application to the Äspö site
E. Fillion and M.-L. Noyer 1

Comparing dispersivities and soil chloride concentrations of turfgrass-covered undisturbed and disturbed soil columns
S.K. Starrett, N.E. Christians and T.Al Austin 21

Groundwater recharge in the Victoria Nile basin of east Africa: support for the soil moisture balance approach using stable isotope tracers and flow modelling
R.G. Taylor and K.W.F. Howard 31

Storm-water hydrograph separation of run off from a mine-tailings impoundment formed by thickened tailings discharge at Kidd Creek, Timmins, Ontario
T.A. Al and D.W. Blowes 55

Hydrochemical and stable isotope evidence for the extent and nature of the effective Chalk aquifer of north Norfolk, UK
K.M. Hiscock, P.F. Dennis, P.R. Saynor and M.O. Thomas 79

Modelling point rainfall occurrences with the Modified Bartlett–Lewis Rectangular Pulses Model
M.N. Khaliq and C. Cunnane 109

Analytical solution of the solute transport equation for the binary homovalent ion exchange in groundwater
W. Dou and Y.C. Jin 139

Interpretation of groundwater flow patterns through a reconstruction of the tritium precipitation record in the Cochabamba Valley, Bolivia
J. Stimson, D. Rudolph, S. Frape and R. Drimmie 155

Conservation and variability of the evaporative fraction during the daytime
R.D. Crago 173

Determining analytic solutions of multiple species contaminant transport, with sorption and decay
M. Lunn, R.J. Lunn and R. Mackay 195

Regional water balance modelling in the NOPEX area: development and application of monthly water balance models
C.-Y. Xu, J. Seibert and S. Halldin 211

Hydrometric and hydrochemical evidence for fast flowpaths at La Cuenca, Western Amazonia
H. Elsenbeer and A. Lack 237

The use of simple process-based models in the estimate of water balances for mixed land use catchments in East Africa
G. Roberts and R.J. Harding 251

Attenuation of nitrate in aquitard sediments of southern Ontario
W.D. Robertson, B.M. Russell and J.A. Cherry 267

Estimation of interception capacity of the forest floor
W.M. Putuhena and I. Cordery 283

Sampling frequency for monitoring the actual state of groundwater systems
Y. Zhou 301

Biogeochemical control on the temporal variability of trace element concentrations in the Oubangui river (Central African Republic)
P. Seyler and F. Elbaz-Poulichet 319

The impact of land use on stream water quality in Slovakia
P. Pekárová and J. Pekár 333

On the integral equation of the continuous-state stochastic reservoir with seasonally varying auto-correlated inflows
E.H. Lloyd 351
Simulation of acid water movement in canals
T. Van Truong, N. Tat Dac and H. Ngoc Phien 361
Comparing three land surface schemes used in general circulation models
J. Polcher, K. Laval, L. Dümenil, J. Lean and P.R. Rowntree 373
